| TEAM ID       | NM2023TMID15296                                   |
| PROJECT NAME  | IoT based Weather Adaptive Street Lighting System |
| MAXIMUM MARKS | 4 Marks   |

### EMPATHY MAP :

Empathy maps are a tool that helps to understand and visualize the thoughts, feelings, and behaviors of a particular user or stakeholder. In this case, we can use an empathy map to understand the needs and concerns of different stakeholders in an IoT-based weather adaptive street lighting system. Here's an example empathy map:
