**Building Web app using Node-red:**

**Step 1:** Open node red. Give authentication key in the node red which is in ibm platform.

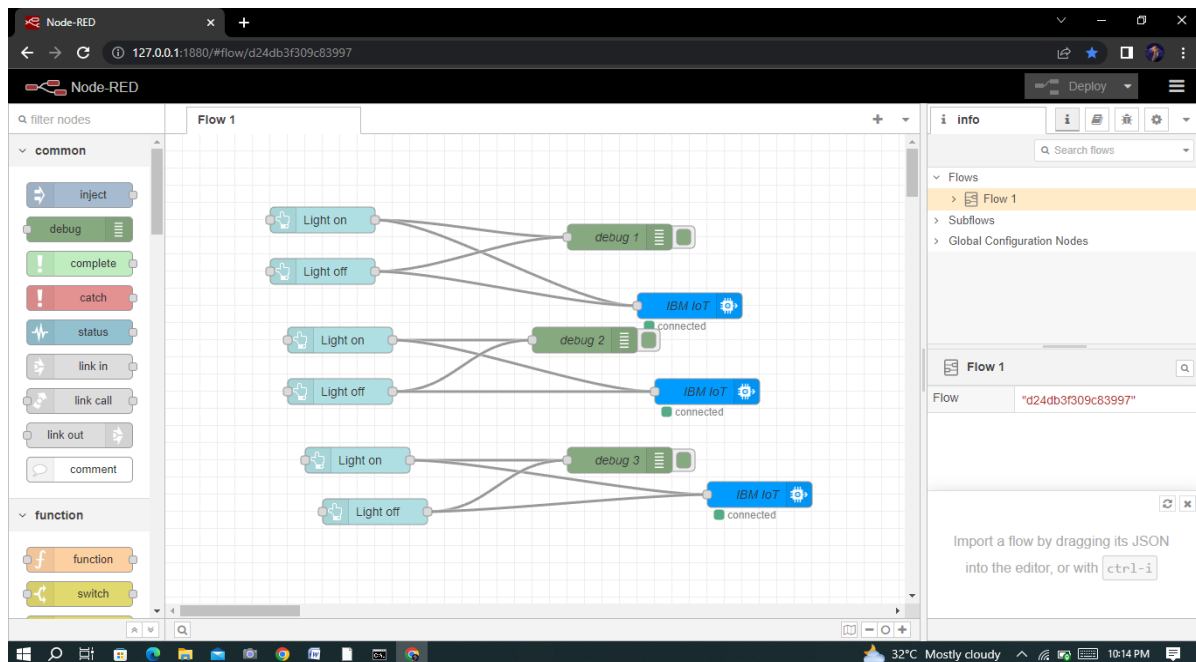

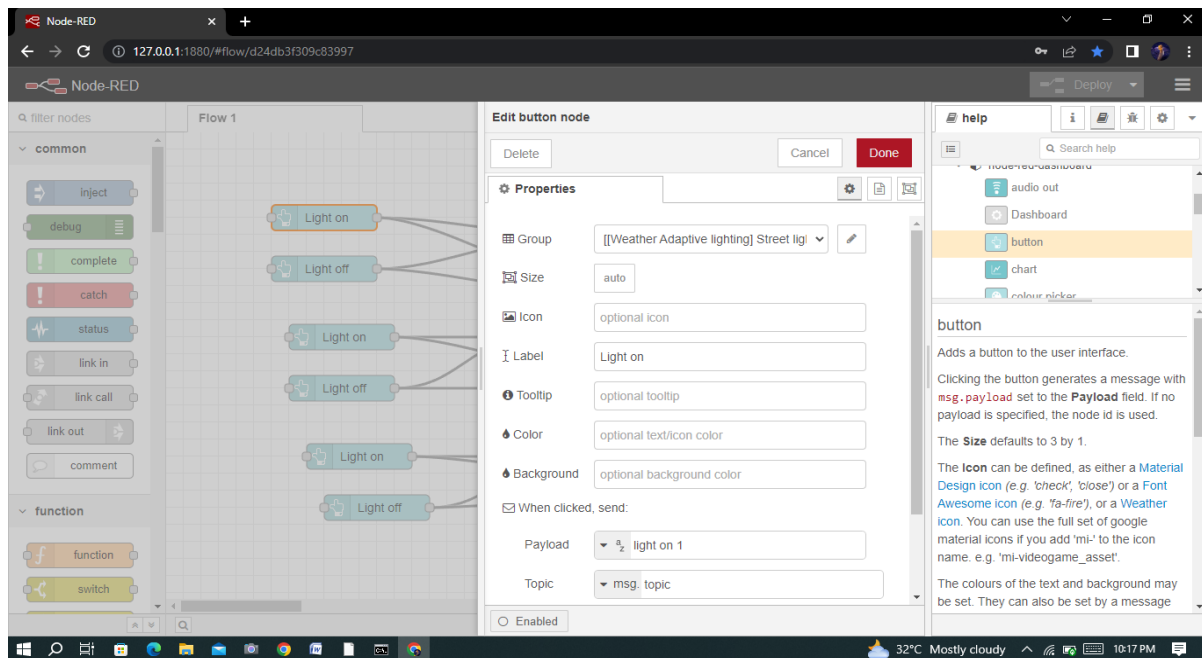

**Step 2:** Go to Manage palette.

**Step 3:** Install Node-red contrib.scx-ibmiotapp and node-red dashboard.

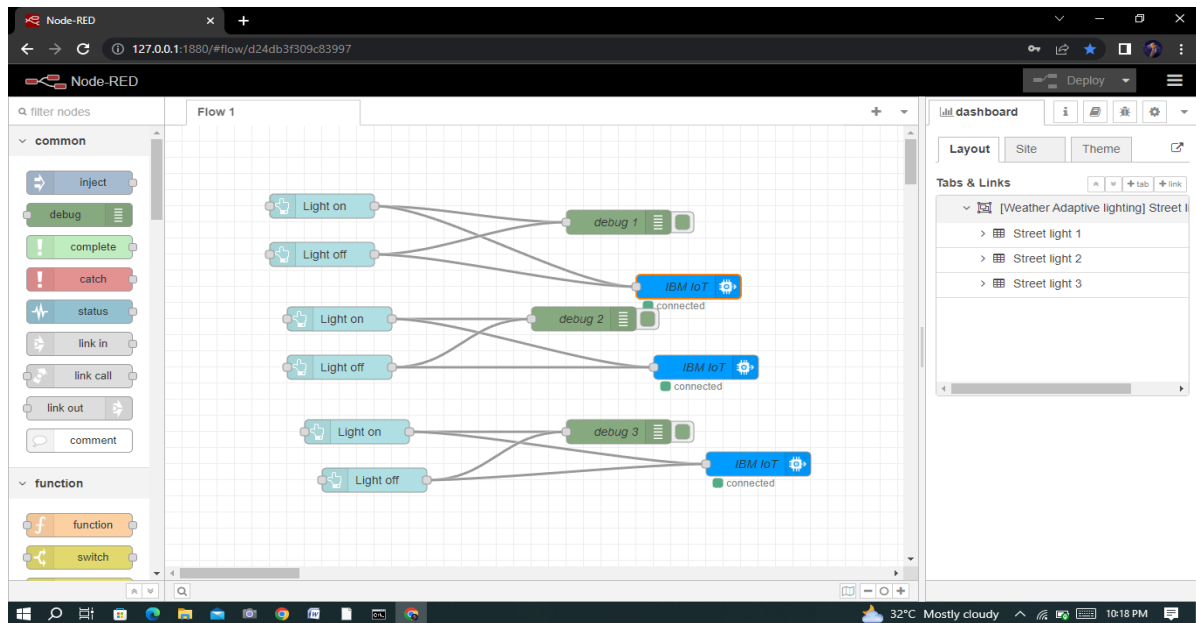

**Step 4:** Connect nodes according to your project.

**Step 5:**Double-click on nodes and change the properties.

**Step 6:** Here is the connection. Go to dashboard and see the interface.

**Step 7:** Interface created successfully.
